

Interview Preparation Pack (role + company)

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a personalised written interview-preparation pack for one role (and company, if you name it) — the likely questions across HR, behavioural, technical and fit rounds with model answer approaches, a "tell me about yourself" pitch built from your own background, STAR stories drawn from your real achievements, honest handling for the tough questions (gaps, why-leaving, salary), smart questions to ask back, and a day-by-day prep plan. It is a written kit to adapt in your own words and practise out loud — not a live voice mock — and it never invents experience you did not provide.

Purpose of this tool & output

A tailored interview kit — likely questions with model answers, your "tell me about yourself", tough-question handling and a prep plan

How the output is used

Use the pack to rehearse — practise the "tell me about yourself" and the likely answers out loud (record yourself), build your own words around the STAR stories, revise the technical topics, and prepare the questions to ask back. Work through the prep-plan day by day before the interview.

Important cautions

The answers and stories are drafts built from what you told it — adapt them into your own words and keep every fact true; reciting them robotically, or claiming experience you never had, will show. It is a written kit to practise, not a live mock interview, and company-specific details should be verified.
