

Personalised Reskilling Roadmap

Document type: Plan / SOP / strategy / guide · Generated 13 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Turns “not hireable yet” into a concrete plan to get there. Given where you are now and the role you want, it identifies the exact skill gap and lays out a sequenced roadmap — free resources first, then paid only where it pays — with India-recognised certifications that actually get people hired, a weekly study structure to your available time, projects to build proof alongside, and indicative time and cost. Honest about what employers really value versus course-marketing.

Purpose of this tool & output

Current profile → target role: a sequenced, time-and-cost plan with India-recognised certs, free-first resources and milestones

How the output is used

Use the roadmap phase by phase — start the free resources first, build the proof-of-work projects alongside, hit each milestone before moving on, and add a recommended certification only when it earns its place. Track your progress against the weekly plan and the target timeline.

Important cautions

Course and certification recognition, prices and links change — verify current details before you pay, and remember that free resources plus real projects usually beat expensive courses. Time and cost figures are indicative; consistent weekly effort matters more than the exact plan.

Companion documents

No related documents are listed on the portal for this tool.

This is AI-assisted guidance. Verify with a qualified professional before any binding decision. Fees, authorities and processes vary by state and change over time — confirm with your state authority.
