

Batch Tracking & Recall Readiness

Pharmacy & Chemist Retail

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a batch-tracking and recall-readiness plan — batch-wise stock and sales records, traceability, and the process to handle an NSQ/spurious-drug alert or recall quickly. Use it to be traceable and recall-ready. For spurious-drug prevention use the Spurious Drug Prevention tool (P6).

Purpose of this tool & output

Trace batches and handle drug recalls

How the output is used

Use it to trace batches and handle drug recalls — a batch tracking and recall-readiness process that finds affected stock fast.

Important cautions

Batch traceability lets you immediately quarantine and pull a batch flagged as Not-of-Standard-Quality, spurious or recalled — a patient-safety and legal necessity. Keep batch-wise purchase records and monitor drug-authority/company recall alerts. Follow official recall instructions. Adapt to your software.
