

Pharmacy Billing & POS Setup

Pharmacy & Chemist Retail

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a billing/POS setup plan for a pharmacy — pharmacy software selection, batch/expiry-linked billing, GST invoicing, schedule-drug capture and integration with inventory. Use it to set up compliant, efficient billing. For inventory tech use the Pharmacy Software tool (P14).

Purpose of this tool & output

Bill accurately with pharmacy software

How the output is used

Use it to bill accurately with pharmacy software — a billing and POS setup that captures batch, expiry and GST correctly.

Important cautions

Use pharmacy-specific software with batch-and-expiry-linked billing integrated to inventory — it drives compliance, expiry control and stock accuracy that generic retail POS cannot. Ensure GST/HSN and schedule-drug support and reliable data backup. Verify current software features.
