

Central Warehouse & Distribution Setup

Pharmacy & Chemist Retail

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a plan to set up a central warehouse/distribution for a pharmacy chain — licensing (wholesale/C&F), storage and cold chain, buying power, stock allocation and store supply. Use it to build the central-supply backbone. For chain strategy use the Chain Model tool.

Purpose of this tool & output

Set up central supply for a pharmacy chain

How the output is used

Use it to set up central supply for a pharmacy chain — a central warehouse and distribution setup across storage, licence and dispatch.

Important cautions

A central warehouse unlocks buying power and control for a pharmacy chain but needs a wholesale drug licence and competent person, proper storage/cold chain, and disciplined central stock/expiry management with full traceability. Justify it against overhead by store count/volume. Confirm wholesale licensing requirements.
