

Drug Distributor / Stockist Selection

Pharmacy & Chemist Retail

Document type: Plan / SOP / strategy / guide · Generated 13 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a distributor-selection framework — evaluating stockists on genuineness/licensing, range, margin/schemes, fill-rate, credit and returns — for reliable, genuine supply. Use it to build the supply base. For the supply contract use the Distributor Agreement (P11).

Purpose of this tool & output

Choose reliable, genuine drug distributors

How the output is used

Use it to choose reliable, genuine drug distributors — a selection guide across authorisation, range, credit and service.

Important cautions

Source only from licensed distributors dealing in genuine products — spurious/grey drugs are a serious patient-safety and legal liability. Fill-rate and cold-chain handling matter as much as margin/schemes. Spread across distributors for coverage. Verify wholesale licences and genuineness.
