

In-Pharmacy Health Services Setup

Pharmacy & Chemist Retail

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a plan to offer in-pharmacy health services — BP/blood-sugar/BMI checks, health-monitoring and screening camps — to add footfall, differentiation and (chronic) patient capture within scope. Use it to add health services. For clinical role use the Pharmacist Role Guide.

Purpose of this tool & output

Offer BP, sugar and health checks

How the output is used

Use it to offer BP, sugar and health checks — an in-pharmacy health services setup that adds value and footfall.

Important cautions

In-pharmacy health checks (BP/sugar/BMI) draw footfall and capture chronic patients but must stay within scope — report abnormal readings and refer to a doctor, never diagnose or start treatment. Use single-use lancets/strips and proper sharps disposal. Obtain consent. Confirm the scope of permitted services locally.
