

# Pharmacy Inventory Technology & Automation

Pharmacy & Chemist Retail

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

## Background

Produces an inventory-technology plan — barcode/scanning, expiry and reorder automation, analytics and integration — to control a wide pharmacy inventory efficiently. Use it to modernise inventory. For the core software use the Pharmacy Software Selection Guide.

## Purpose of this tool & output

Automate inventory, expiry and reordering

## How the output is used

Use it to automate inventory, expiry and reordering — an inventory technology and automation guide that cuts stockouts and expiry loss.

## Important cautions

The highest-ROI pharmacy inventory automation is batch/expiry tracking with near-expiry alerts (to cut expiry via timely returns) and reorder automation across the wide SKU base. Add barcode scanning and analytics. For chains, central inventory/transfers help. Adapt to your scale and verify tool features.
