

Pharmacy Location Analyzer

Pharmacy & Chemist Retail

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Analyses a location for a pharmacy — prescriber proximity, catchment, visibility/access, competition and licence/zoning feasibility — with a suitability call. Use it to choose or judge a site. For the go/no-go use the Feasibility Study.

Purpose of this tool & output

Pick the right spot for a chemist

How the output is used

Use it to pick the right spot for a chemist — nearness to clinics/hospitals, footfall and competition that decide a pharmacy site.

Important cautions

Proximity and visibility to a prescriber cluster (hospital/clinic exit) is the biggest pharmacy location advantage. An incumbent chemist with doctor relationships nearby is a serious risk. Verify licence/zoning permissibility. Validate prescription footfall by observation.
