

Pharmacy Model Selector

Pharmacy & Chemist Retail

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Compares pharmacy models — standalone, chain/franchise, generic (Jan Aushadhi), hospital, online — on capital, margin, support, competition and risk, and recommends the fit. Use it to choose direction. For setup use the Pharmacy Setup Guide.

Purpose of this tool & output

Choose the right pharmacy model

How the output is used

Use it to choose the right pharmacy model — standalone, chain, hospital, generic or online against your capital and location.

Important cautions

Chains bring buying power and brand but take fees/control; standalone chemists win on service and location; Jan Aushadhi offers government-backed low-cost generics; e-pharmacy has scale but regulatory uncertainty. Match the model to your capital, qualification and local competition.
