

Multi-Store Operations Playbook

Pharmacy & Chemist Retail

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a playbook for running multiple pharmacy stores — central purchasing/warehouse, common systems, inventory/expiry control across stores, area management and compliance. Use it to manage a growing chain. For a single new store use the New Store Business Case.

Purpose of this tool & output

Run multiple pharmacies consistently

How the output is used

Use it to run multiple pharmacies consistently — a multi-store operations playbook across SOPs, systems and reporting.

Important cautions

Multi-store pharmacy wins through central buying power, inter-store stock transfers (to cut expiry), common systems and rigorous per-store compliance tracking (each store needs its own licence/pharmacist/register). Build central purchasing and compliance systems before scaling stores. Adapt to your chain.
