

Schedule H1 & Antibiotic Stewardship

Pharmacy & Chemist Retail

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a Schedule H1 compliance and antibiotic-stewardship plan — the H1 register, prescription discipline for antibiotics/habit-forming drugs, and responsible dispensing. Use it to comply with H1 and dispense antibiotics responsibly. For all scheduled drugs use the Schedule H/H1/X Guide.

Purpose of this tool & output

Comply with H1 rules and curb antibiotic misuse

How the output is used

Use it to comply with H1 rules and curb antibiotic misuse — the Schedule H1 register and stewardship a pharmacy must maintain.

Important cautions

Schedule H1 drugs (specified antibiotics, anti-TB, habit-forming) must be dispensed only against a valid prescription and recorded in the H1 register (prescriber/patient/drug/quantity/date, retained per rules) — selling antibiotics over the counter is illegal and fuels antimicrobial resistance. The H1 register is inspected. Confirm current H1 drug list and retention period.
