

Surgical & Medical Consumables Range

Pharmacy & Chemist Retail

Document type: Plan / SOP / strategy / guide · Generated 13 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a surgical and medical-consumables range plan — dressings, disposables, diagnostic devices and home-care items — for higher-margin, prescriber-linked demand. Use it to build the surgical range. For chronic-care items use the Chronic Care Range tool.

Purpose of this tool & output

Stock surgicals, devices and consumables

How the output is used

Use it to stock surgicals, devices and consumables — a surgical and medical-consumables range for clinics and home care.

Important cautions

Surgical/consumables and home-care devices add higher-margin, recurring (strips/consumables), prescriber-linked demand — stock what nearby hospitals/clinics and home-care patients need. Ensure genuine products; some devices are regulated as medical devices. Adapt to your catchment.
