

Pharmacy Online Technology Platform

Pharmacy & Chemist Retail

Document type: Plan / SOP / strategy / guide · Generated 13 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a technology plan for an online pharmacy channel — ordering app/site, prescription upload/verification, catalogue/inventory sync, payments, delivery tracking and data security. Use it to build the online tech. For setup use the E-Pharmacy Setup Guide.

Purpose of this tool & output

Build the tech for an online pharmacy

How the output is used

Use it to build the tech for an online pharmacy — a technology platform guide across catalogue, dispensing, compliance and delivery.

Important cautions

Build the prescription-upload-and-pharmacist-verification gate into the platform (prescription drugs cannot be auto-fulfilled) and integrate with inventory/billing for stock/batch/price accuracy. Secure sensitive health data per the DPDP Act. Choose build-vs-buy sensibly. Confirm e-pharmacy rules; this is general guidance.
