

School Feasibility Study

School Administration

Document type: Financial model / analysis · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Analyses whether a school project is viable — catchment demand and demographics, competition and fee capacity, land/board fit, enrolment ramp realism and break-even — with a go/no-go. Use it before committing capital. For the full plan use the School Business Plan.

Purpose of this tool & output

Check if a school will fill and sustain

How the output is used

Use the study to check whether a school will fill and sustain — demand, capacity and economics.

Who should vet it

A CA/education consultant, to validate demand and financial assumptions.

Important cautions

Schools fill slowly and are capital-heavy; a location that cannot ramp enrolment sustainably is a long, expensive mistake. Validate demand on the ground.
