This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Drafts a school transport service contract (with a transport contractor) with each term separate — vehicles and routes, rates, safety compliance (fitments, verified drivers, mandatory attendants), liability, and term — so contracted transport is safe and accountable. Use it to contract transport. For the safety plan use the School Transport Safety Plan tool.

The school and the transport operator — both sign; a copy each.

Fees & charges

Stamp duty per your state if it creates a stampable obligation.

Who should vet it
