

DG Set Maintenance Plan

Security & Facility Management

Document type: Plan / SOP / strategy / guide · Generated 28 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Get a diesel-generator maintenance plan — routine checks, service intervals, load testing, fuel and emissions/consent compliance — so backup power is always ready. Describe the DG setup below.

Purpose of this tool & output

Power backup that starts every time

How the output is used

Use it for power backup that starts every time — a DG set maintenance plan across service, load-test and fuel.

Important cautions

AI-generated plan; follow OEM service and SPCB emission/consent requirements.
