

Security Manpower Assessment

Security & Facility Management

Document type: Financial model / analysis · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Get an assessment of the security manpower a site needs — posts justified by risk and coverage, day/night manning, supervision, and whether the current strength is right, over or under — to right-size the guard force. Describe the site below.

Purpose of this tool & output

Right-size the guard force

How the output is used

Use it to right-size the guard force — a security manpower assessment that matches posts, shifts and reliefs to real need.

Who should vet it

A security consultant or the client, to confirm the manpower numbers against the site risk and coverage need.

Important cautions

AI-generated assessment; validate with a site survey and risk assessment.
