

Security Risk Assessment

Security & Facility Management

Document type: Financial model / analysis · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Get a security risk assessment for a site or organisation — threats and vulnerabilities, likelihood and impact scoring, and prioritised mitigation measures — to focus security spend on real risks. Describe the site below.

Purpose of this tool & output

Score risks and prioritise measures

How the output is used

Use it to score risks and prioritise measures — a security risk assessment that ranks threats and directs the security spend.

Who should vet it

A security consultant, to validate the risk scoring and recommended measures before you rely on them.

Important cautions

AI-generated assessment; validate with a physical site survey.
