

Physical Security Survey

Security & Facility Management

Document type: Financial model / analysis · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Get a physical security survey framework and findings-style output for a site — the areas to inspect (perimeter, access, lighting, systems, procedures) and observations with recommendations — to assess and improve site security. Describe the site below.

Purpose of this tool & output

Walk the site and find the gaps

How the output is used

Use it to walk the site and find the gaps — a physical security survey that documents weaknesses and recommendations.

Who should vet it

A security consultant, to confirm the survey findings and recommendations before you act.

Important cautions

AI-generated framework; conduct an on-site survey to finalise findings.

Companion documents

- Security Risk Assessment
- Threat Assessment
- Vulnerability Assessment
- Perimeter Security Plan
- Security Manpower Assessment
- Security Audit

This is AI-assisted guidance. Verify with a qualified professional before any binding decision. Fees, authorities and processes vary by state and change over time — confirm with your state authority.
