

Coaching Batch Economics

Sports, Fitness & Recreation

Document type: Financial model / analysis · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Model the economics of a coaching batch — fee revenue vs coach cost, facility/allocated cost, at different batch sizes — to find break-even fill and profit per batch, so you price and size batches right. Enter the batch inputs below.

Purpose of this tool & output

Know the profit in each batch

How the output is used

Use it to know the profit in each batch — a coaching batch economics view across fees, coach cost and utilisation.

Who should vet it

A finance-savvy owner, to confirm the batch cost and fill assumptions.

Important cautions

AI-generated model; batch fill drives profit given fixed coach/facility cost - but keep ratios safe.
