This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Designs a digital onboarding and engagement flow for frontline or gig workers — self-onboarding, verification, activation, communication and engagement nudges. Use it to onboard at scale and keep workers active. For attrition use the Frontline Attrition Control tool.

Purpose of this tool & output

Onboard and engage frontline workers digitally

How the output is used

Use it to onboard and engage frontline workers digitally — a worker onboarding and app engagement approach that speeds deployment.

Important cautions

Time-to-first-task determines whether a worker ever activates and earns — reduce onboarding friction and drive fast activation. Communicate pay and process honestly in the worker language. Handle worker data with consent and provide a real support channel.
