

Dispatch Control Tower Design

Transport & Fleet

Document type: Plan / SOP / strategy / guide · Generated 16 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Designs a dispatch control-tower setup — roles, boards, live tracking, check-call cadence, exception handling and daily reporting — so a growing fleet is run proactively, not reactively. Use it to professionalise dispatch. For the metrics use the Fleet Utilization Dashboard Plan.

Purpose of this tool & output

Design a control room to run the fleet in real time

How the output is used

Use it to design a control room to run the fleet in real time — a dispatch control tower design across staffing, screens and process.

Important cautions

Right-size the control tower to trip volume; process matters more than software.
