

# Fuel Management Plan

Transport & Fleet

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

## Background

Builds a fuel management plan — benchmarking mileage per vehicle/route, driving-behaviour levers, fuelling controls, tyre/pressure and idle reduction, and a monitoring routine — to cut fuel, usually the largest fleet cost. Use it to reduce fuel spend. For pilferage specifically use the Fuel Theft Detection & Control Plan.

## Purpose of this tool & output

Take control of your biggest cost

## How the output is used

Use it to take control of your biggest cost — a fuel management plan across mileage, procurement and driver behaviour.

## Important cautions

Mileage depends on load, terrain and traffic; benchmark like-for-like.
