

Load Matching & Return-Load Plan

Transport & Fleet

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a plan to reduce empty running — return-load sourcing, load boards and broker relationships, lane pairing and triangulation, and rate floors for backhauls. Use it when trucks run empty one way. For a specific lane rate use the Freight Rate Calculator.

Purpose of this tool & output

Kill empty running with a return-load strategy

How the output is used

Use it to kill empty running with a return-load strategy — a load matching and return-load plan that lifts loaded-km and margin.

Important cautions

Verify new load providers to avoid non-payment and fraud.
