

# Route Optimization Plan

Transport & Fleet

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

## Background

Analyses your routes and delivery pattern to cut distance, fuel and time — clustering stops, sequencing, avoiding empty legs and matching vehicles — and gives a reorganised plan. Use it to reduce running cost. For dispatch process use the Dispatch Control Tower Design.

## Purpose of this tool & output

Cut km, fuel and time across your routes

## How the output is used

Use it to cut km, fuel and time across your routes — a route optimization plan that reduces empty and detour running.

## Important cautions

Estimates; validate with real distances and traffic on the ground.
