This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds an airfare and routing strategy for an international trip — routing options and trade-offs (direct vs connecting, hubs), fare types and rules, baggage and ancillaries, and booking-timing tips — so you offer good value air with fewer surprises. Use it for complex air. For ticketing operations use the Air Ticketing & GDS Setup tool.

Purpose of this tool & output

Find smart routings and fare strategies

How the output is used

Use it to find smart routings and fare strategies — an international airfare and routing strategy across fares, connections and rules.

Important cautions

Fares and rules change constantly; verify live pricing, baggage and change rules before booking.
