

Tour Package Costing Sheet

Travel & Tourism

Document type: Financial model / analysis · Generated 29 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a package cost and selling price from discrete inputs — hotels, transport, activities, guide, meals, air, per-head fixed costs and markup — so packages are priced profitably per pax and per group. Use it to price a package. For the quotation use the Travel Quotation Builder.

Purpose of this tool & output

Cost a package from discrete cost lines

How the output is used

Use it to cost a package from discrete cost lines — a package costing sheet that builds price from stay, transport, activities and margin.

Who should vet it

Your CA or finance lead, to confirm the cost lines and margin in the package price before you quote.

Important cautions

Confirm live rates and exchange rate; group costs per head fall with size — state the assumed group size.
