

BIS ISI Certification Guide

Water, RO & Sanitation

Document type: Licence / statutory filing · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Explains mandatory BIS ISI certification for packaged drinking and mineral water — the standard, plant and lab requirements, testing, documents and the application and audit process. Use it to get and keep ISI certification.

Purpose of this tool & output

Get ISI certification for packaged water

How the output is used

Use it to get ISI certification for packaged water — the BIS ISI mark (IS 14543 / IS 13428) mandatory before you can sell packaged drinking or mineral water.

Who receives it

The ISI licence is granted by the Bureau of Indian Standards (BIS) under the relevant IS standard for packaged drinking / mineral water.

How to submit / file it

Apply to BIS with the factory, machinery, in-house lab and test reports; a BIS inspection and independent sample testing precede the licence.

Fees & charges

Application, marking and annual licence fees plus the cost of the in-house lab and testing; the licence is renewed periodically.

Who should vet it

BIS and a certification consultant, which verify the plant, lab and product quality before grant.

Important cautions

BIS ISI certification is mandatory for packaged water and selling without it is an offence; requirements and standards are detailed and audited. Confirm the current standard and requirements with BIS and prepare the plant and lab accordingly.
