

Borewell & Water Source Services Guide

Water, RO & Sanitation

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a guide to a borewell drilling, recharge and water-source development service — equipment, siting, legality and safety, and compliance including borewell-capping law. Use it to run a source-development business responsibly.

Purpose of this tool & output

Run a borewell / source-development service

How the output is used

Use it to run a borewell or source-development service — a borewell and water source services guide across drilling, compliance and safety.

Important cautions

Open and abandoned borewells are a fatal child-safety hazard and capping is legally mandatory; groundwater extraction is regulated and drilling success is uncertain. Comply strictly with capping law and groundwater rules and prioritise safety.
