

Bottle & Jar Management System

Water, RO & Sanitation

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a system to manage returnable jars and packaging — tracking, deposits, inspection and rejection, life cycle and losses — a major cost and hygiene lever for jar water. Use it to control jar assets and hygiene.

Purpose of this tool & output

Manage returnable jars and bottles

How the output is used

Use it to manage returnable jars and bottles — a bottle and jar management system across tracking, cleaning and replacement.

Important cautions

Returnable jars are a significant asset, cost and contamination risk; weak tracking and inspection cause losses and hygiene failures. Enforce inspection and rejection and reconcile the fleet regularly.
