

Commercial / Institutional RO Setup

Water, RO & Sanitation

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Produces a plan to set up RO and water treatment for a commercial building, institution or campus — sizing, plumbing integration, quality, and O&M — for captive drinking water. Use it for institutional water projects.

Purpose of this tool & output

Set up RO for a building or campus

How the output is used

Use it to set up RO for a building or campus — a commercial and institutional RO setup guide across sizing, plumbing and O&M.

Important cautions

Sizing and treatment depend on population and source and safe drinking water is a duty of care; poor O&M causes quality failures. Confirm design and O&M with a technical provider and test water periodically.
