

CSR Water Project Design Guide

Water, RO & Sanitation

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Helps design a CSR-funded community water or sanitation project — needs assessment, model, budget, impact metrics and sustainability and O&M — to attract and deliver corporate funding. Use it to propose a CSR water project.

Purpose of this tool & output

Design a fundable CSR water project

How the output is used

Use it to design a fundable CSR water project — a CSR water project design guide across need, impact, budget and reporting.

Important cautions

CSR water projects often fail after handover without a funded O&M and ownership model; funders increasingly demand measurable, sustainable impact. Build in O&M funding and community ownership and confirm CSR-rule alignment.
