

Institutional Supply / Rate Contract

Water, RO & Sanitation

Document type: Contract / agreement · Generated 13 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Drafts a rate or supply contract for bulk water supply to an institution or corporate — dispensers, jars or bottles, quality assurance, service levels and payment. Use it to formalise a B2B institutional account.

Purpose of this tool & output

Contract bulk supply to an institution

How the output is used

Use the draft to contract bulk supply to an institution — quantity, quality, rate, credit and SLA with discrete terms — reviewed by a lawyer.

Who receives it

The agreement is between the water business and the institution; each keeps a signed copy.

Fees & charges

Stamp duty per your state stamp act where applicable; the rate, quality-SLA and credit-period terms are the key content.

Who should vet it

A lawyer, to check the quality-SLA, credit-period and liability clauses before signing.

Important cautions

A draft template, not legal advice; quality-assurance, SLA, credit and equipment-return terms are the key commercial points and institutional credit strains cash. Have a lawyer review and confirm certification coverage before signing.

Companion documents

- Water Supply Agreement
- Distributor / Dealer Agreement
- AMC / Service Contract
- Plant O&M Contract
- Water/Sanitation PPP Concession Agreement
- Tanker Water Supply Agreement

processes vary by state and change over time — confirm with your state authority.
