

Water Business Model Selector

Water, RO & Sanitation

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Compares water and sanitation business models against your resources — packaged water, RO plant, water ATM, purifier AMC, tanker, treatment or FSM — and recommends the best fit. Use it to decide before committing.

Purpose of this tool & output

Choose the right water business model

How the output is used

Use it to choose the right water business model — packaged water, RO, water ATM, tanker, treatment or sanitation against your capital and market.

Important cautions

Model fit depends on your water source and quality, capital, location and regulatory ability; the packaged-water market is crowded while treatment and AMC are service-heavy. Validate source, demand and competition before committing.
