

Plastic Waste & EPR Compliance Guide

Water, RO & Sanitation

Document type: Licence / statutory filing · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Explains plastic-waste and Extended Producer Responsibility (EPR) obligations for water businesses using plastic bottles and packaging — registration, targets, and how to comply. Use it to meet plastic-waste rules.

Purpose of this tool & output

Meet plastic EPR obligations

How the output is used

Use it to meet plastic EPR obligations — the Extended Producer Responsibility registration and targets a bottled-water maker owes for its plastic packaging.

Who receives it

The EPR registration is with the Central Pollution Control Board (CPCB) on the EPR portal under the Plastic Waste Management (EPR) rules.

How to submit / file it

Register as a producer/brand-owner, declare plastic placed on the market, and file periodic returns meeting the recycling/EPR targets.

Fees & charges

Registration and the EPR obligation cost (credits or processing) per the rules; non-compliance attracts environmental compensation.

Who should vet it

An EPR consultant, to register correctly and reconcile the targets and returns with CPCB.

Important cautions

Plastic-waste and EPR rules, targets and portals change and are increasingly enforced; non-compliance attracts penalties. Confirm current obligations and the registration process with the Pollution Control Board and the EPR portal.
