

Preventive Maintenance Schedule Builder

Water, RO & Sanitation

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a preventive-maintenance schedule for water equipment and plant — tasks, intervals, spares and responsibility — to maximise uptime and quality and cut breakdowns. Use it to plan maintenance across assets.

Purpose of this tool & output

Build a PM schedule for equipment

How the output is used

Use it to build a PM schedule for equipment — a preventive maintenance schedule builder across assets, tasks and intervals.

Important cautions

Intervals depend on equipment, water quality and load; hard or fouling water shortens them. Follow equipment-maker guidance and adjust intervals to your conditions and monitor performance.
