

# Water Quality Management System

Water, RO & Sanitation

Document type: Plan / SOP / strategy / guide · Generated 28 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

## Background

Builds a quality-management system for a water business — standards, control points from source to customer, testing, documentation and improvement — to keep water consistently safe and pass audits. Use it to systematise quality.

## Purpose of this tool & output

Systematise quality across the business

## How the output is used

Use it to systematise quality across the business — a water quality management system across standards, testing, records and audits.

## Important cautions

A framework to build from; standards and audit requirements are set by BIS and FSSAI and must be met consistently. Align control points and limits with the applicable standard and your certification requirements.

## Companion documents

- Water Testing Protocol
- Service & AMC Operations SOP
- Installation & Commissioning SOP
- Customer Complaint & Service Recovery SOP
- Plant Safety & Chemical Handling Plan
- Preventive Maintenance Schedule Builder
