

Plant / Site Selection Guide

Water, RO & Sanitation

Document type: Plan / SOP / strategy / guide · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Evaluates a site for a water plant or unit — water source, power, drainage for reject, access, zoning and market proximity — and scores suitability. Use it before leasing or buying a site.

Purpose of this tool & output

Choose a site for a water plant

How the output is used

Use it to choose a site for a water plant — a plant and site selection guide across source, power, access and market.

Important cautions

A checklist, not a substitute for water-yield and quality testing and a zoning and clearance-feasibility check. Confirm source legality (CGWA), zoning and pollution-consent feasibility before committing.
