

Water Supply Agreement

Water, RO & Sanitation

Document type: Contract / agreement · Generated 27 Aug 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Drafts a water supply agreement between a supplier and a customer (society, office, institution) — quantity, quality, price, delivery and quality-assurance terms. Use it to formalise a supply relationship.

Purpose of this tool & output

Contract to supply water to a customer

How the output is used

Use the draft to contract water supply to a customer — quantity, quality, price, delivery and liability with discrete terms — reviewed by a lawyer.

Who receives it

The agreement is between the water business and the customer; each keeps a signed copy.

Fees & charges

Stamp duty per your state stamp act where applicable; GST is handled in invoicing, and the quality, quantity and liability terms are the key content.

Who should vet it

A lawyer, to check the quality-guarantee, liability and payment clauses before signing.

Important cautions

A draft template, not legal advice; water-quality liability and jar-deposit and safety terms matter and packaged water needs BIS and FSSAI compliance. Have a lawyer review and confirm stamping before signing.

Companion documents

- Distributor / Dealer Agreement
- AMC / Service Contract
- Plant O&M Contract
- Water/Sanitation PPP Concession Agreement
- Tanker Water Supply Agreement
- Institutional Supply / Rate Contract
