

Water Sustainability & ESG Plan

Water, RO & Sanitation

Document type: Plan / SOP / strategy / guide · Generated 14 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Builds a sustainability and ESG plan for a water business — source stewardship and recharge, reject and energy reduction, plastic and EPR, and responsible operations — to cut impact and meet expectations. Use it to run responsibly and future-proof.

Purpose of this tool & output

Make the water business sustainable

How the output is used

Use it to make the water business sustainable — a water sustainability and ESG plan across water reuse, energy and plastic responsibility.

Important cautions

Extracting bulk water, especially groundwater in stressed areas, carries real sustainability, regulatory and reputational risk; plastic and reject add to it. Prioritise source stewardship and recharge and comply with groundwater and EPR rules.
