

Water Quality Standards Guide

Water, RO & Sanitation

Document type: Plan / SOP / strategy / guide · Generated 15 Oct 2026

This guide explains what the tool produces, how to use the output, and what to watch for. The actual output (draft/report) is generated on the tool page.

Background

Explains the water quality standards a water business must meet — IS 10500 drinking water, packaged-water standards, key parameters and testing — so your water is safe and compliant. Use it to set quality targets and testing.

Purpose of this tool & output

Understand and meet water quality norms

How the output is used

Use it to understand and meet water quality norms — a water quality standards guide across the parameters your product or service must meet.

Important cautions

Standards and limits are specific and periodically revised and testing must use accredited methods and labs. Confirm current limits with BIS and your accredited testing lab and treat to meet them consistently.
