

Interior Design & Architecture — 112 tools

All tools · at-a-glance descriptions · Generated 16 Oct 2026

This is the full list of AiSevak tools in this industry, each with a short description of what it produces. Open any tool on aisevak.in to run it.

Design Business Setup & Studio Ops

Interior / Design Business Setup Guide

Get a practical, phased plan to start an interior-design or architecture practice in India — positioning, registrations, team and vendor network, tools, and go-to-market — with sequence, approximate costs and timelines. Describe your plan below.

Design Studio Setup Guide

Get a guide to setting up a design studio/office — layout and zones (workstations, material library, meeting/presentation, samples), tools and software, and client-experience — that inspires clients and helps the team deliver. Describe the studio below.

Interior / Design Business Plan

Generate a structured business plan for an interior/architecture venture — market, services, delivery model (design vs turnkey), financials and funding ask — suitable for a bank or investor. Describe your venture below.

Design Business Feasibility Study

Get a feasibility study for a design business move — launching turnkey, a new city/studio, or a product line — covering demand, model economics, working capital and execution risk, and a go/no-go view. Describe the opportunity below.

Service Portfolio & Packages

Design a service portfolio and packages for an interior/design practice — service lines (consultation, design-only, turnkey, styling), deliverables, ideal client, and fee models — so prospects understand and buy. Describe your services below.

Design Firm Org Structure

Get an organisation and role structure for an interior/design firm — design team, execution/site team, BD/client management, and support — with responsibilities and hire priorities, sized to your firm. Describe it below.

Design Project Delivery SOP

Produce an SOP for delivering interior/design projects — enquiry to brief, concept and design, documentation and BOQ, execution/site, and handover — with stage gates and client approvals, for consistent delivery. Describe your projects below.

Architect Registration (COA) Guide

Get a guide to Council of Architecture (COA) registration and the professional framework for architects in India — eligibility, the process, use of title, and what interior designers can/cannot do — so you practise within the law. Describe your context below.

Client & Project Brief

Interior Design Brief

Create a structured interior design brief — the space, users and lifestyle, style and preferences, functional needs, budget and timeline — so design starts from a clear, agreed brief. Describe the project below.

Requirement Capture Questionnaire

Generate a client requirement questionnaire for an interior project — covering lifestyle, room-wise needs, style, storage, budget and practical constraints — to capture everything in the first meeting and avoid surprises. Describe the project type below.

Site Survey & Measurement Guide

Get a site survey and measurement checklist for an interior project — dimensions, levels, services (electrical/plumbing/HVAC), structural elements, and existing conditions — so design is based on accurate site data. Describe the site below.

Mood Board / Concept Brief

Create a mood board and concept-direction brief for an interior project — the theme, palette, materials and textures, and reference direction — to align the client on look-and-feel before detailed design. Describe the vision below.

Scope of Work Document

Generate a scope-of-work document for an interior project — area/room-wise inclusions, what is excluded, deliverables and stages — to attach to a proposal or contract and prevent scope disputes. Describe the project below.

Design Concept Note

Write a design concept note for an interior project — the design philosophy, spatial idea, material and light approach, and how it meets the client's needs — to present the concept and win buy-in. Describe the project below.

Lifestyle & Preferences Questionnaire

Generate a lifestyle and preferences questionnaire — daily routines, entertaining, cooking, hobbies, storage habits, and aesthetic likes — to design spaces that truly fit how the client lives. Describe the household below.

Budget Planning & Allocation Brief

Build a budget-allocation brief for an interior project — splitting the budget across works (civil, false ceiling, electrical, modular, furniture, painting, decor) with benchmarks and priorities — so the client's budget is realistic and well-directed. Enter the budget and scope below.

Space Planning & Concept Design

Space Planning Guide

Get a space-planning approach for a space — zoning, furniture layout options, circulation and clearances, and functional optimisation — so the plan works for how the space is used. Describe the space below.

Concept Design Development

Develop a concept design for a space or home — the design language, spatial and material concept, room-wise direction, and how it delivers the brief — as the design foundation to detail. Describe the project below.

Layout Options Generator

Generate two or three layout options for a room or space — each with a different arrangement, trade-offs, and best-fit use — so the client can choose the approach that suits them. Describe the space below.

Zoning & Functional Planning

Get a zoning plan for a larger space or open plan — dividing it into functional zones (living, dining, work, play), defining boundaries (rugs, levels, partitions), and flow — so an open space works hard without feeling cluttered. Describe the space below.

Ergonomics & Standards Guide

Get an ergonomics and standard-dimensions guide for a space or element — counter and storage heights, clearances, seating and circulation standards — so the design is comfortable and functional. Describe the element below.

Circulation & Flow Plan

Get a circulation and flow plan for a home or space — main movement paths, clearances, door swings, and avoiding bottlenecks and cross-traffic — so movement is effortless and safe. Describe the space below.

Vaastu-Aware Design Guide

Get a Vaastu-aware design guide for a home — the common Vaastu considerations by area (entrance, kitchen, bedrooms, pooja, water), how to accommodate them sensibly, and where to balance with practical design — for clients who value Vaastu. Describe the home below.

Small Space Design Plan

Get a design plan for a small/compact space — space-saving layout, multi-functional and built-in furniture, storage maximisation, and visual tricks — to make a small home feel spacious and function fully. Describe the space below.

Design Development & Documentation

Working Drawings Guide

Get a guide to the working-drawings set for an interior project — the drawings needed (layouts, ceilings, electrical, plumbing, elevations, sections, details), conventions and coordination — so site executes exactly as designed. Describe the project below.

Joinery & Detailing Guide

Get a detailing guide for a joinery/carpentry element — construction, materials and hardware, dimensions, and site-buildable detailing — so wardrobes, kitchens, units and paneling are made correctly. Describe the element below.

Material & Finish Schedule

Generate a material and finish schedule for an interior project — room/element-wise specification of flooring, walls, ceiling, joinery finishes, hardware and fixtures with brand/spec basis — so procurement and site use the exact right materials. Describe the project below.

3D Visualisation Brief

Create a brief for 3D visualisation/rendering of an interior — the views, materials and lighting to show, style and quality level, and deliverables — to brief a 3D artist and get renders that win client approval. Describe the project below.

Design Presentation Structure

Get a structure and content plan for an interior design presentation — flow from concept to visuals, materials and budget, and the sign-off ask — so the client understands, loves and approves the design. Describe the project below.

Drawing Issue & QA Checklist

Get a QA checklist to review an interior working-drawing set before issuing to site — completeness, coordination (electrical vs ceiling vs furniture), dimensions, and constructability — so drawings do not cause site errors and rework. Describe the set below.

MEP / Services Coordination Guide

Get a services (MEP) coordination guide for an interior project — coordinating electrical, plumbing, HVAC/AC and low-voltage with the design and false ceiling — so services fit the design and site avoids clashes. Describe the project below.

Tender / GFC Drawing Package Guide

Get a guide to preparing a tender / Good-for-Construction drawing and document package for an interior project — the drawings, specifications and BOQ needed for contractors to price and build accurately. Describe the project below.

Residential Interiors

Complete Home Interior Plan

Generate a complete home interior plan — room-by-room design direction, scope and key elements, material and budget approach, and a phasing/timeline — as the master plan for the whole home. Describe the home below.

Living Room Design

Get a design for a living room — layout and seating, TV/feature wall, storage, lighting, materials and decor — balancing style, function and budget. Describe the room below.

Bedroom Design

Get a design for a bedroom — layout, bed and wardrobe, storage, lighting, materials and a calm palette — for a restful, functional room (master, guest or elder). Describe the room below.

Kitchen Design

Get a kitchen design — layout (work triangle), storage and modular units, counter and materials, appliances and services, and finishes — suited to Indian cooking, durable and efficient. Describe the kitchen below.

Bathroom Design

Get a bathroom design — layout and fixtures, wet/dry zoning, tiles and materials, storage, lighting/ventilation, and waterproofing/plumbing notes — for a functional, durable, stylish bathroom. Describe the bathroom below.

Kids Room Design

Get a design for a kids/children's room — flexible layout, study and play, storage, safety, and a fun-yet-adaptable theme that grows with the child. Describe the room and child below.

Home Renovation Plan

Get a renovation plan for an existing home — what to keep vs change, scope and sequence, working around occupancy, and budget priorities — to renovate smartly with minimal disruption and cost. Describe the renovation below.

Pooja / Prayer Room Design

Get a design for a pooja/prayer space — placement and size (dedicated room or unit), the mandir/unit design, storage, materials, lighting and ventilation, and Vaastu-aware direction — for a serene prayer space. Describe the requirement below.

Balcony / Terrace Design

Get a design for a balcony or terrace — layout and use (lounge, garden, dining), flooring and weatherproof materials, greenery, seating, lighting and privacy — to create an enjoyable outdoor space. Describe the space below.

Commercial & Office Interiors

Office Interior Design

Get an office interior design — space planning (workstations, cabins, meeting, collaboration, pantry), branding, acoustics, lighting and services, and a productive layout — for an efficient, on-brand office. Describe the office below.

Retail Store Design

Get a retail store design — storefront and layout, customer flow and display/merchandising zones, lighting, branding and billing — to attract footfall and maximise sales per sq ft. Describe the store below.

Restaurant / Cafe Design

Get a restaurant/cafe design — layout and seating mix, kitchen/service flow, ambience and theme, lighting, and the practical F&B requirements — to create an experience that seats well and runs efficiently. Describe the outlet below.

Workspace Planning & Space Norms

Get a workspace-planning analysis for an office — headcount vs area, space norms and mix of settings, growth flexibility, and an efficient allocation — so the space fits the team comfortably. Describe the requirement below.

Showroom Design

Get a showroom design — display and product-experience zones, customer journey, lighting to showcase products, branding, and consultation/billing areas — to present products compellingly. Describe the showroom below.

Clinic / Healthcare Interior Design

Get an interior design for a clinic or small healthcare space — reception and waiting, consultation and treatment rooms, hygiene and infection-control-friendly materials, flow and privacy, and calm ambience — for a functional, reassuring space. Describe the clinic below.

Hotel / Hospitality Interior Design

Get an interior design direction for a hotel or hospitality space — lobby, guest rooms, F&B/common areas, or a boutique property — covering guest experience, durable materials, and operational practicality. Describe the property below.

Commercial Fit-out Plan

Get a fit-out plan for a commercial space (office/retail/F&B) — from bare shell to ready — covering scope, services, approvals, contractor packages, sequence and timeline, so the fit-out is delivered on time and to spec. Describe the project below.

Modular & Furniture

Modular Kitchen Design & Spec

Get a modular kitchen design and specification — layout and modules, carcass and shutter materials, hardware and accessories, counter and finishes, and a module list — ready to cost and manufacture. Describe the kitchen below.

Wardrobe Design & Spec

Get a wardrobe design and specification — type (sliding/openable/walk-in), internal storage layout, materials and finish, hardware, and a spec ready to cost and make — optimised for the user's storage needs. Describe the wardrobe below.

Furniture Specification

Generate a furniture specification for a project — piece-wise details (dimensions, materials, finish, upholstery, construction) for built-in and loose furniture — so it is made or procured correctly. Describe the furniture below.

Carpentry / Joinery BOQ

Generate a carpentry/joinery bill of quantities for a project — item-wise units, quantities (sq ft/running ft), materials and finish, and rate basis — so carpentry is priced and executed accurately. Describe the scope below.

Storage Solutions Plan

Get a storage-solutions plan for a home or space — room-wise storage opportunities (built-in, hidden, vertical, multi-functional), and smart storage ideas for a clutter-free home. Describe the home and storage needs below.

Furniture Layout Plan

Get a furniture layout plan for a room or home — what furniture, its placement, sizes to fit, and circulation — so the space is functional, comfortable and not cluttered. Describe the space below.

Modular vs Site Carpentry Advisor

Get advice on whether to go factory-modular or site-carpentry for a project — comparing quality, finish, timeline, cost and site conditions — so you choose the right approach for the client and project. Describe the situation below.

Loose Furniture & Decor Plan

Get a loose-furniture and decor plan for a home — the furniture, rugs, curtains, lighting, art and accessories to curate, with style, sizes and a budget split — to complete and style the home. Describe the home below.

Materials, Finishes & Lighting

Material Selection Guide

Get material selection guidance for an application — options, pros/cons on durability, maintenance, look and cost, and a recommendation — so you pick the right material for the use and budget. Describe the need below.

Finish Schedule Builder

Generate a room-wise finish schedule — floor, wall, ceiling and skirting finishes with material/colour/code — as the definitive finishes reference for the project. Describe the project below.

Flooring Selection Guide

Get flooring guidance — comparing options (tiles, marble/stone, wood/laminate/vinyl, etc.) on durability, maintenance, comfort, look and cost for each area — with a recommendation. Describe the requirement below.

Wall Finish & Treatment Guide

Get wall-finish guidance for a space — comparing paint, texture, wallpaper, paneling, stone/brick veneer and other treatments on look, durability, cost and where each works — with recommendations for feature and regular walls. Describe the space below.

False Ceiling Design

Get a false-ceiling design for a space — design/profile, material (gypsum/POP), integrated lighting and services (AC/electrical), and height considerations — to enhance the space and integrate services. Describe the space below.

Lighting Design

Get a lighting design for a space — layered lighting (ambient, task, accent), fixture selection and placement, colour temperature, controls and circuits — to make the space functional and beautiful at all times. Describe the space below.

Colour Scheme & Palette

Get a colour scheme for a home or room — a coherent palette (base, secondary, accent), room-wise application, and how it works with light and materials — to create a harmonious, mood-right home. Describe the requirement below.

Sustainable Interior Materials Guide

Get a guide to sustainable and healthy interior materials — eco-friendly and low-VOC options for finishes, boards, paints and furnishings, plus energy/water-smart choices — for a greener, healthier home. Describe the project below.

Execution & Site Management

Site Execution SOP

Produce a site execution SOP for interior projects — mobilisation, work sequence, quality checks per stage, coordination and safety, and progress/records — so site runs to plan and quality. Describe your projects below.

Contractor & Vendor Coordination Plan

Get a coordination plan for the many contractors/vendors on an interior site — trade sequence and dependencies, responsibilities, interfaces, and a coordination cadence — so trades don't clash and work flows. Describe the project below.

Site Quality Checklist

Get a stage-wise quality checklist for an interior site — what to check at each stage (civil, electrical, false ceiling, flooring, carpentry, painting, finishing) with acceptance criteria — to catch quality issues before they are buried. Describe the project below.

Snag List & Rectification Plan

Get a snag-list framework and rectification plan for an interior project near completion — what to inspect room-by-room, how to record snags, and track rectification to a clean handover. Describe the project below.

Project Schedule / Timeline

Generate a project schedule for an interior project — phases, activities, durations, dependencies and milestones from start to handover — so the timeline is realistic and trackable. Describe the project below.

Interior Site Safety Guide

Get a site-safety guide for an interior fit-out site — hazards and controls (electrical, work-at-height, dust/chemicals, tools), housekeeping, and worker/occupant safety — to run a safe site and meet basic obligations. Describe the site below.

Project Handover Checklist

Get a handover checklist for an interior project — completion and snag closure, cleaning, functional testing, documentation (warranties, manuals, as-built), and client sign-off — for a professional, dispute-free handover. Describe the project below.

Progress Tracking & Reporting SOP

Produce a progress-tracking and client-reporting SOP for interior projects — daily/weekly site tracking, photo updates, milestone and payment linkage, and issue flagging — so projects stay on track and clients stay informed. Describe your context below.

Architecture & Approvals

Building / Architecture Design Brief

Create an architectural design brief for a building project — site and context, program and spaces, budget, regulatory constraints, and design aspirations — so an architect designs to a clear brief. Describe the project below.

Building Bye-laws Compliance Guide

Get a guide to the building bye-laws that shape a project — FAR/FSI, setbacks, ground coverage, height, parking and other controls — so the design stays within permissible limits. Describe the plot and project below.

Building Plan Approval Guide

Get a guide to municipal building-plan approval/sanction for a project — the process, documents and clearances, the architect's role, and typical timelines — so you know the approval path. Describe the project below.

Structural Coordination Guide

Get a guide to coordinating interior/architecture design with structure — what interior changes are safe vs need a structural engineer (removing/altering walls, loading terraces, core cuts), and how to coordinate — so the design is safe and code-compliant. Describe the situation below.

Green Building (IGBC/GRIHA) Guide

Get a guide to green-building rating (IGBC/GRIHA/LEED) for a project — what the ratings reward, the key credits/strategies (energy, water, materials, indoor environment), and how to pursue a rating — for a greener building. Describe the project below.

Fire Safety Compliance Guide

Get a guide to fire-safety requirements affecting a building or interior fit-out — exits and travel distance, materials, detection/suppression, and NOC/approval — so the space is fire-safe and compliant. Describe the project below.

Completion / Occupancy Certificate Guide

Get a guide to obtaining the completion and occupancy certificate for a building — what it is, why it matters, the process and documents, and common issues (deviations) — so the building is legally occupiable. Describe the project below.

NBC / Accessibility Compliance Guide

Get a guide to National Building Code (NBC) and accessibility provisions relevant to a project — the areas NBC covers (safety, egress, services, accessibility) and universal-design/accessibility requirements — so the design meets code and is inclusive. Describe the project below.

Estimation, Costing & BOQ

Interior BOQ Preparation

Generate a bill of quantities for an interior project — item-wise works, units, quantity basis and specification — structured so it can be priced accurately and compared across contractors. Describe the scope below.

Interior Cost Estimate

Build a cost estimate for an interior project — category-wise costs (per-sq-ft or item), a total, and per-area breakdown — to give the client a credible budget figure. Enter the project and rate inputs below.

Interior Quotation Builder

Generate a professional, itemised quotation for an interior project — scope line items with quantities and amounts, taxes, terms and validity — ready to send the client. Enter the scope and pricing below.

Client Budget Planning Guide

Get a budget-planning guide to have the realistic-budget conversation with a client — benchmarks by home size and finish level, where money goes, and how to align scope to budget — so the project starts on a realistic footing. Describe the project below.

Project Cost Control Plan

Get a cost-control plan for an interior project — tracking committed vs budgeted, managing variations and scope creep, procurement discipline, and margin protection — so the project stays within budget and profitable. Describe your situation below.

Rate Analysis

Build a rate analysis for an interior work item — material, labour, wastage and overhead/margin — to arrive at a defensible unit rate for estimating or negotiating with vendors. Describe the item below.

Value Engineering Guide

Get value-engineering options for an interior project that is over budget — where to substitute materials/specs, simplify or phase, and re-prioritise — to cut cost while protecting the look and function the client cares about. Describe the situation below.

Package / Per-Sq-Ft Pricing Model

Get a package and per-sq-ft pricing model for a turnkey interiors business — tiered packages (essential/premium/luxury) with inclusions and price/sq-ft — so clients get transparent, comparable pricing and you protect margin. Describe your business below.

Client Management & Marketing

Interior Design Proposal

Generate a persuasive proposal for an interior/design project — understanding of the client's needs, your approach and scope, deliverables and process, indicative investment, and why-you — to convert an enquiry. Describe the opportunity below.

Portfolio Building Guide

Get a guide to building a compelling interior-design portfolio — what to include and how to present projects (photography, before/after, story), structure, and using it across channels — to win clients. Describe your situation below.

Interior Social Media Plan

Get a social media plan for an interior/design business — platform mix, content pillars (projects, tips, process, before/after, reels), a content calendar, and enquiry handling — to build an audience and generate leads. Describe your business below.

Interior Lead Generation Plan

Get a lead-generation plan for an interior/design business — target clients and triggers (new homes/possession), channels (social, ads, builder/agent tie-ups, referrals, listings), and follow-up — to build a steady enquiry pipeline. Describe your business below.

Client Management SOP

Produce a client-management SOP for interior projects — enquiry and onboarding, communication cadence, approvals and expectation-setting, issue handling, and post-project referral — so clients stay happy and refer you. Describe your context below.

Interior Business Marketing Plan

Get a marketing plan for an interior/design business — positioning and brand, channel mix (social, portfolio, tie-ups, PR, referrals), content, and a low-cost action calendar — to build a brand and a steady pipeline. Describe your business below.

Interior / Design Firm Profile

Generate a professional company profile for an interior/design firm — about and philosophy, services and process, portfolio highlights and clients, team, and contact — for clients, proposals and tie-ups. Describe your firm below.

Testimonial & Case Study Builder

Create a case study and testimonial framework for a completed interior project — the brief, challenge, solution, and outcome with the client's words — to build persuasive proof for marketing and proposals. Describe the project below.

Finance & Contracts

Design Fee & Pricing Model

Get a design-fee and pricing model for an interior/architecture practice — fee models (percentage, per-sq-ft, lump-sum, hourly), what to charge for design vs turnkey, and how to value and protect your fee — to price profitably. Describe your situation below.

Interior / Design Firm P&L

Build a profit-and-loss view for an interior/design firm — revenue (design fee vs turnkey execution), cost of execution, overheads and profit, with margins — to understand and improve profitability. Enter your figures below.

Turnkey Project Costing & Margin

Cost a turnkey interior project — all execution costs (materials, vendors, site) against the contract value — to see the true margin before signing, and spot risk items. Enter the project and cost inputs below.

Interior Design Services Agreement

Draft an interior design services agreement between a designer and a client — scope and deliverables, design stages and approvals, fees and payment, revisions and IP, and liability — for a design-only engagement. Fill in the terms below.

Turnkey Interior Contract

Draft a turnkey (design + execution) interior contract between a firm and a client — scope and specifications, price and payment stages, timeline, variations, quality/warranty, and liability — for a design-build project. Fill in the terms below.

Contractor / Trade Agreement

Draft an agreement with a contractor or trade vendor (carpenter, false-ceiling, painter, electrician, modular) — scope, rates, quality, timeline and payment — to engage site trades reliably. Fill in the terms below.

Material / Product Vendor Agreement

Draft a vendor agreement for a material/product supplier (tiles, sanitaryware, hardware, modular, furniture, lighting) — products and pricing, quality, delivery, and warranty — for reliable supply on projects. Fill in the terms below.

Design Firm Working Capital Plan

Get a working-capital plan for a turnkey interiors firm — the project float (paying vendors/materials before client stage-payments), client-payment structuring, and funding/levers — since turnkey cash flow is the core risk. Describe your situation below.

Project Payment Schedule

Generate a client payment schedule for an interior project — stage-wise milestones and percentages linked to progress, so collection stays ahead of your spend and both sides are clear. Enter the project below.

HR & Team

Designer Hiring Kit

Get a hiring kit for an interior-design role — job description, must-have skills (design, software, detailing, client), a portfolio/design-test assessment, and interview questions — to hire capable designers who fit. Describe the role below.

Design & Site Team Structure

Get a team structure for an interior/design firm — how to split design, project management and site execution, ratios and responsibilities, and when to hire vs outsource — sized to your project load. Describe your firm below.

Design Firm HR Policy Handbook

Generate an HR policy handbook for an interior/design firm — employment, working hours and site visits, leave, conduct and confidentiality (designs/clients), POSH and grievance — practical for a mixed studio-and-site team. Describe the firm below.

Freelancer / Consultant Agreement

Draft an agreement to engage a freelance interior professional — 3D artist, designer, draughtsperson or consultant — covering scope, fees, deliverables, IP and confidentiality, for project-based work. Fill in the terms below.

Site Team & Supervisor Management

Get a plan to manage site supervisors and execution staff — roles and daily routines, reporting and quality accountability, incentives, and multi-site coordination — so site delivery is consistent across projects. Describe your setup below.

Team Training & Skill Plan

Get a training plan for an interior-firm team — design and software skills, detailing and site knowledge, materials, client handling, and process/standards — to build a capable, consistent team. Describe your team below.

This is AI-assisted guidance. Verify with a qualified professional before any binding decision. Fees, authorities and processes vary by state and change over time — confirm with your state authority.
