

Telecom, ISP & Cable — 117 tools

All tools · at-a-glance descriptions · Generated 27 Aug 2026

This is the full list of AiSevak tools in this industry, each with a short description of what it produces. Open any tool on aisevak.in to run it.

ISP & Broadband Operations

ISP / Broadband Business Setup Guide

Get a practical, phased plan to launch a local ISP or FTTH broadband business in India — licence (UL-VNO / ISP), network and last-mile infrastructure, upstream bandwidth, billing and NOC, staffing and go-live — with approximate costs and timelines per phase. Fill in your plan below.

ISP Business Plan Builder

Get a structured ISP/broadband business plan — market and coverage, service and pricing, network build, subscriber and revenue projections, cost structure and funding ask — ready to show a bank or investor. Fill in your business details below.

FTTH Rollout Plan

Get a phased FTTH rollout plan for a defined area — GPON architecture (OLT, splitters, ONT), feeder and distribution fibre, homes-passed sequencing, RoW and permissions, and a materials checklist. Fill in your rollout scope below.

NOC Operations SOP

Get a Network Operations Centre (NOC) SOP for your ISP or telecom network — monitoring and alerting, incident severity levels, escalation matrix, shift handover, and outage response and reporting. Fill in your NOC context below.

Subscriber Onboarding Kit

Get a complete new-subscriber onboarding kit for your broadband business — KYC and documentation, installation workflow, welcome communication, and a first-week follow-up plan — so new connections activate cleanly and reduce early churn. Fill in your context below.

Broadband Plan & Bouquet Designer

Design a compelling broadband plan line-up — speed tiers, data policy, pricing ladder, OTT and value-adds, and contract terms — positioned against local competition. Get a plan grid you can publish. Fill in your inputs below.

Service Level Agreement (SLA) Policy

Draft a customer-facing SLA policy for your broadband or enterprise service — uptime targets, restoration timelines, credit/rebate schedule for breaches, exclusions and measurement method — that is fair and enforceable. Fill in your commitments below.

Fair Usage Policy (FUP) Writer

Draft a transparent Fair Usage Policy for your broadband plans — data thresholds, post-FUP speed, unlimited-plan norms and abuse handling — worded to be clear to customers and TRAI-consistent. Fill in your policy inputs below.

Bandwidth Capacity Plan

Get a bandwidth capacity plan for your ISP — current utilisation review, contention/oversubscription guidance, headroom targets, and an upstream-bandwidth growth forecast tied to subscriber additions. Fill in your network details below.

ISP Operations & Compliance Audit

Get a structured operations and compliance audit of your ISP — network resilience, NOC and support maturity, licensing and TRAI/DoT obligations, KYC and data practices, and billing integrity — with prioritised findings and a remediation roadmap. Fill in your context below.

Cable TV & DTH Operations

Cable TV (LCO) Business Setup Guide

Get a practical setup guide for a Local Cable Operator (LCO) business in India — registration under the Cable TV Networks Act, MSO tie-up and interconnect, DAS/STB rollout, subscriber management and billing, and licences. Fill in your context below.

MSO Registration & Compliance Guide

Get a guide to registering and operating as a Multi-System Operator (MSO) in India — MIB registration, DAS headend and SMS/CAS requirements, LCO interconnect framework, TRAI tariff/interconnect regulations, and ongoing reporting. Fill in your context below.

DAS Compliance Guide

Get a Digital Addressable System (DAS) compliance guide for a cable operator or MSO — set-top-box addressability, CAS/SMS integrity, seamless subscriber activation/deactivation, and audit-ready records the regulator expects. Fill in your context below.

Channel Packaging & NCF Planner

Design a compliant cable/DTH channel package structure under the TRAI tariff order — Network Capacity Fee (NCF), a-la-carte and bouquet mix, DPO margins, and a customer-facing rate card. Fill in your inputs below.

Cable Subscriber Agreement

Draft a cable/broadband subscriber agreement — services and package, charges and billing cycle, STB/CPE ownership, installation and deactivation, and grievance redressal — clear and consistent with TRAI subscriber norms. Fill in the terms below.

LCO-MSO Interconnect Agreement

Draft an LCO-MSO interconnect agreement — signal supply, subscriber reporting, revenue share, NCF and pay-channel settlement, SLAs and termination — aligned to the TRAI interconnect regulation. Fill in the deal terms below.

Cable Billing & Collection SOP

Get a billing and collection SOP for a cable/broadband operator — monthly billing cycle, payment channels, dunning for defaulters, deactivation policy, and reconciliation against the SMS to plug revenue leakage. Fill in your context below.

DTH Dealer / Distributor Plan

Get an operating and growth plan for a DTH dealership/distributorship — activation and recharge operations, inventory of STBs, commission structure, service and installation, and local marketing. Fill in your context below.

Licensing & Regulatory Compliance

Telecom Licence Selector

Get guidance on which DoT authorisation fits your telecom business — ISP/UL-VNO, Unified Licence, IP-I (infrastructure), PM-WANI, or cable/MSO registration — with eligibility, entry fee/bank guarantee expectations and next steps. Describe your business below.

ISP / UL-VNO Licence Application Guide

Get a step-by-step guide to applying for an ISP or UL-VNO authorisation from DoT — eligibility and company requirements, entry fee and bank guarantees, documentation, and post-award compliance obligations. Fill in your context below.

Unified Licence Authorisation Guide

Get a guide to the DoT Unified Licence framework — the available service authorisations (Access, ISP, NLD, ILD, IP-I and more), how to add authorisations, and the migration path from legacy licences. Describe what you need below.

Right of Way (RoW) Application Kit

Get a Right of Way (RoW) application kit under the Indian Telegraph RoW Rules 2016 — application content, authority mapping (municipal/NHAI/state portal), documentation, restoration undertakings, and follow-up strategy. Fill in your project below.

Licence Fee & AGR Compliance Guide

Get a compliance guide to licence fee and Adjusted Gross Revenue (AGR) reporting for a DoT licensee — what counts as gross and adjusted revenue, quarterly statements and payments, SUC where relevant, and record-keeping to withstand a DoT audit. Fill in your context below.

TRAI / DoT Compliance Calendar

Get a tailored TRAI/DoT compliance calendar for your telecom or cable business — licence fee statements, subscriber and QoS reports, KYC audits, security and other periodic filings — mapped to a month-by-month schedule with owners. Fill in your context below.

Customer KYC / CAF SOP

Get a customer KYC / Customer Application Form (CAF) SOP aligned to DoT customer-acquisition norms — document capture, verification, record retention, and audit-ready controls — for SIM, broadband or DTH activation. Fill in your context below.

Lawful Interception Readiness SOP

Get a lawful-interception and security-conditions readiness SOP for a licensed operator — nodal officer designation, request handling, logging and confidentiality, and network monitoring readiness under licence security conditions. Fill in your context below.

PM-WANI Public Wi-Fi Setup Guide

Get a setup guide for public Wi-Fi under the PM-WANI framework — the PDO, PDOA and app-provider roles, registration, hardware and captive-portal setup, bandwidth sourcing and revenue model. Fill in your plan below.

Tower EMF Compliance Guide

Get an EMF (electromagnetic field) radiation compliance guide for mobile tower/BTS sites — DoT/TERM emission limits, self-certification and testing, documentation, and community-concern handling. Fill in your site context below.

Telecom Regulatory Audit

Get a structured regulatory audit of your telecom/cable business against DoT and TRAI obligations — licensing, licence fee/AGR, KYC, security conditions, QoS and subscriber reporting, and RoW/EMF — with prioritised gaps and a remediation roadmap. Fill in your context below.

Infrastructure & Towers

IP-I Registration Guide

Get a guide to registering as an Infrastructure Provider Category-I (IP-I) with DoT — what IP-I permits (passive infrastructure: towers, dark fibre, ducts, right of way), registration steps, and the commercial model for leasing to licensed operators. Fill in your context below.

Tower Site Lease Agreement

Draft a tower/rooftop site lease agreement between a site owner and an infrastructure/telecom company — rent and escalation, access, power and structural terms, EMF and safety, and term and exit. Fill in the deal terms below.

Tower Rollout Plan

Get a phased tower/BTS rollout plan — site acquisition, civil and electrical works, permissions (SACFA, structural, municipal), operator onboarding for sharing, and a phase timeline with milestones. Fill in your rollout scope below.

OFC Laying Project Plan

Get a project plan for an optical fibre cable (OFC) laying route — survey and route design, RoW and permissions, trenching/HDD or aerial method, materials and manpower, and a phased execution schedule. Fill in your project scope below.

In-Building Solution (IBS) Plan

Get an in-building solution (IBS/DAS) plan for a building or campus — coverage assessment, active/passive DAS design approach, operator onboarding, and cabling and headend requirements. Fill in the property details below.

Passive Infrastructure Sharing Agreement

Draft a passive infrastructure sharing agreement between an infrastructure provider and a telecom operator — shared elements, charges and escalation, access and O&M responsibilities, SLAs and liability. Fill in the deal terms below.

SACFA / WPC Clearance Guide

Get a guide to SACFA siting clearance and WPC spectrum licensing for wireless links or towers in India — when each is needed, the application flow, documents, and typical timelines. Fill in your context below.

Tower & Site Safety SOP

Get a safety SOP for tower and telecom site work — working at height, electrical and DG safety, permit-to-work, PPE, and emergency response — to protect technicians and meet safety obligations. Fill in your context below.

Tower / Site O&M AMC Contract

Draft an operations and maintenance (O&M) AMC contract for telecom tower/sites — scope of preventive and breakdown maintenance, uptime SLAs and penalties, spares and fuel management, and payment terms. Fill in the deal terms below.

Site Acquisition SOP

Get a site acquisition SOP for tower/infrastructure rollout — search-ring survey, owner negotiation, technical and structural feasibility, documentation and approvals, and handover to build. Fill in your context below.

Mobile Retail & Distribution

Mobile & Recharge Shop Setup Guide

Get a practical setup plan for a mobile handset, accessories, SIM and recharge retail shop — distributor tie-ups, opening stock and display, KYC-compliant SIM activation, billing and licences — with approximate costs. Fill in your context below.

Recharge / Distribution Business Plan

Get an operating and growth plan for a recharge, SIM and DTH distribution business — retailer network building, wallet and margin management, target and beat planning, and collections. Fill in your context below.

Retail SIM Activation SOP

Get a retail SIM activation SOP aligned to DoT norms — document capture and verification, tele-verification, record-keeping, and controls to prevent fraudulent or bulk activations that can attract penalties. Fill in your context below.

Distributor-Retailer Agreement

Draft a distributor-retailer agreement for a telecom recharge/SIM/device channel — appointment and territory, margins and incentives, wallet and credit terms, obligations and KYC responsibility, and termination. Fill in the deal terms below.

Device Inventory & IMEI SOP

Get an inventory SOP for a mobile retail/distribution business — IMEI-level stock tracking, GRN and returns, fast/slow-mover control, and shrinkage prevention for high-value devices. Fill in your context below.

Mobile Shop Marketing Plan

Get a local marketing plan for a mobile/recharge shop — festive and launch offers, exchange and EMI messaging, WhatsApp and Google Business presence, and referral tactics to grow footfall and repeat sales. Fill in your context below.

Mobile Repair Service SOP

Get a service SOP for a mobile repair operation — job intake and device condition logging, estimate and approval, spares and warranty handling, turnaround and customer communication, and quality checks. Fill in your context below.

Retailer Commission Structure Designer

Design a retailer/channel commission and incentive structure for a telecom distribution business — base margin, slab and target incentives, activation bonuses, and clawbacks — that drives the right behaviour without eroding your margin. Fill in your inputs below.

Mobile Retail Compliance Checklist

Get a compliance checklist for a mobile/recharge retail shop — Shops and Establishment, GST and e-invoicing thresholds, SIM-activation KYC obligations, e-waste and BIS for accessories, and consumer/warranty rules. Fill in your context below.

Sales & Enterprise Proposals

Leased Line / ILL Proposal

Generate a professional Internet Leased Line (ILL) proposal for an enterprise customer — solution and bandwidth, SLA and redundancy, pricing and contract terms, and onboarding timeline — tailored to the customer need. Fill in the opportunity below.

Enterprise Connectivity Solution Proposal

Generate a multi-site enterprise connectivity proposal — MPLS/SD-WAN/internet mix, topology, redundancy and security, SLA and managed services, and phased pricing — for a customer with several locations. Fill in the requirement below.

Retention & Win-Back Plan

Get a retention and win-back plan for your broadband/telecom base — churn-driver analysis, save-desk offers and scripts, proactive at-risk outreach, and a lapsed-subscriber win-back campaign. Fill in your context below.

Broadband Sales Pitch & Script

Get a door-to-door and telephonic broadband sales pitch and script — hook, plan positioning, objection handling (price, speed, existing provider), and a clear close — for your feet-on-street and tele-sales teams. Fill in your context below.

Telecom RFP / Tender Response Builder

Build a structured response to an enterprise or government connectivity RFP/tender — understanding and compliance matrix, technical solution, SLA and support, commercial approach, and credentials. Paste the RFP context below.

Channel Partner Agreement

Draft a channel partner agreement for a telecom/ISP business — appointment and territory, commission and payout, targets, brand and conduct, confidentiality, and term and termination. Fill in the deal terms below.

Upsell & Cross-Sell Plan

Get an upsell and cross-sell plan to lift ARPU from your existing subscribers — speed and plan upgrades, OTT and value-add bundles, business add-ons, and the triggers and messaging to convert. Fill in your context below.

Corporate / SME Proposal Builder

Generate a polished B2B telecom proposal for a corporate or SME customer — need summary, recommended services, SLA and support, commercials and terms, and next steps — for connectivity, voice, cloud or managed services. Fill in the opportunity below.

Telecom Sales Playbook

Get a sales playbook for your telecom/ISP business — target segments and value propositions, the sales process and stages, qualification criteria, objection handling, and KPIs — so every rep sells the same winning way. Fill in your context below.

Customer Service & Grievance

Grievance Redressal SOP

Get a grievance redressal SOP for your telecom/ISP business — complaint capture and docketing, resolution SLAs, escalation and appellate authority, and reporting — consistent with TRAI consumer-protection norms. Fill in your context below.

Customer / Citizen Charter

Draft a customer charter for your telecom/ISP business — service standards, provisioning and fault-repair timelines, billing and refund commitments, and grievance contacts — that builds trust and sets clear expectations. Fill in your commitments below.

SLA Credit / Rebate Policy

Draft an SLA credit/rebate policy for business and enterprise customers — how downtime is measured, the credit slabs, claim process and caps, and exclusions — so credits are fair, automatic and dispute-free. Fill in your inputs below.

Churn Reduction Plan

Get a churn reduction plan for your broadband/telecom base — churn measurement and cohorts, root-cause mapping, lifecycle interventions, and a save/retention framework with metrics to track. Fill in your context below.

Support Call & Chat Scripts

Get a set of support call and chat scripts for common telecom/ISP scenarios — no internet, slow speed, billing query, relocation, disconnection request — with empathy, troubleshooting steps and clear resolution paths. Fill in your context below.

NPS & Satisfaction Survey Builder

Get an NPS and satisfaction survey for your telecom/ISP subscribers — the core NPS question, driver questions across speed, support and billing, and a plan to close the loop on detractors. Fill in your context below.

Complaint Response Templates

Get ready-to-use complaint and review response templates for a telecom/ISP business — acknowledgement, resolution update, apology with credit, and public review replies — that de-escalate and protect your reputation. Fill in your context below.

Outage Communication Kit

Get an outage communication kit for your telecom/ISP business — proactive notification templates, status-update cadence, restoration and apology messaging, and internal escalation communication — to keep subscribers informed during downtime. Fill in your context below.

Service Recovery Plan

Get a service recovery framework for your telecom/ISP business — recovery principles, tiered goodwill gestures, empowerment guidelines for frontline staff, and follow-up — to win back customers after a service failure. Fill in your context below.

Managed Services & Delivery

Managed Services Proposal

Generate a managed services proposal — scope (managed connectivity, Wi-Fi, security, monitoring), service levels, team and tooling, transition plan, and pricing model — for an enterprise that wants you to run their network. Fill in the opportunity below.

SD-WAN Solution Design

Get an SD-WAN solution design for a multi-site enterprise — link mix and topology, application steering and QoS policies, security and segmentation, and a rollout plan — that improves reliability and cost. Fill in the requirement below.

Managed Services SLA Contract

Draft a managed services agreement with SLAs — scope and responsibilities matrix, service levels and credits, change and exit management, liability and confidentiality — between a provider and an enterprise customer. Fill in the deal terms below.

Network Migration Plan

Get a low-risk network migration plan — current-state assessment, target design, cutover approach and rollback, communication, and validation — for moving an enterprise to new connectivity or provider. Fill in the migration context below.

Service Delivery SOP

Get a service delivery SOP for enterprise telecom orders — order-to-activation workflow, feasibility and provisioning, project coordination, testing and acceptance, and handover to support. Fill in your context below.

Managed NOC Runbook

Get a managed-NOC incident runbook set for common telecom incidents — link down, high latency, device unreachable, DDoS suspicion, power/DG failure — with detection, triage, action and escalation steps for consistent handling. Fill in your context below.

Capacity Management Plan

Get a capacity management plan for your managed network or ISP — what to monitor, thresholds and headroom, a forecasting method tied to growth, and an upgrade decision framework — so you avoid congestion and over-provisioning. Fill in your context below.

Enterprise Customer Onboarding Kit

Get an enterprise onboarding kit — welcome pack, roles and contacts, escalation matrix, service and support guide, and a 30-60-90 success plan — so business customers feel confident from day one. Fill in your context below.

Bulk Communications & VAS

DLT Registration Guide

Get a step-by-step guide to registering as an enterprise/entity on a TRAI DLT (Distributed Ledger Technology) platform — entity KYC, header (sender ID) and consent template registration, and choosing an operator DLT portal — so your business messaging is compliant under the TCCCPA. Fill in your context below.

SMS Content Template Builder

Get DLT-compliant SMS content templates with correct variable placeholders and category tagging — OTP, transactional alerts, and promotional offers — worded to pass DLT approval and read well to customers. Fill in your messaging needs below.

Bulk SMS / A2P Business Plan

Get a business plan for a bulk SMS / A2P messaging reseller — operator/aggregator tie-ups, DLT and compliance, pricing and margin, target segments, and platform choice — to launch or grow the business. Fill in your context below.

IVR Script Designer

Design an IVR call flow and voice prompts for your business — greeting, menu structure, self-service options, routing rules and fallback to agent — that reduces wait times and resolves more calls without a human. Fill in your context below.

WhatsApp Business API Setup Guide

Get a setup guide for the WhatsApp Business Platform (API) via a BSP — onboarding and verification, message template categories and approval, opt-in and pricing model, and use-case design — to run compliant customer messaging. Fill in your context below.

VAS Product Plan

Get a product plan for a telecom value-added service (VAS) — concept and target user, packaging and pricing, delivery and billing integration, compliance (consent, easy opt-out), and go-to-market. Fill in your idea below.

DND / UCC Compliance SOP

Get a DND / Unsolicited Commercial Communication (UCC) compliance SOP under TRAI TCCCPA — consent capture and records, DND scrubbing, promotional time-window rules, complaint handling, and audit trail — so your messaging stays penalty-free. Fill in your context below.

CPaaS Solution Proposal

Generate a CPaaS (Communications Platform as a Service) proposal for a business customer — use cases across SMS, WhatsApp, voice and OTP, integration approach, pricing, compliance, and onboarding — to win an API messaging deal. Fill in the opportunity below.

Voice / OBD Campaign Plan

Get a plan for a compliant outbound voice (OBD/voice broadcast) campaign — message design, consent and DND handling, calling windows, response capture (press-1), and measurement — for notifications or lead generation. Fill in your context below.

RCS Business Messaging Plan

Get a plan for RCS (Rich Communication Services) business messaging — verified sender setup, rich-card and carousel use cases, fallback to SMS, consent, and measurement — to run engaging, branded campaigns. Fill in your context below.

Finance & Unit Economics

ISP Profit & Loss Builder

Build a structured monthly and annual profit and loss statement for your ISP/broadband business — revenue by segment, bandwidth and network costs, staff, field and overheads — with margin analysis and cost ratios you can act on. Fill in your figures below.

ARPU Analysis

Get an ARPU (average revenue per user) analysis across your subscriber segments — blended and segment ARPU, mix effects, and the biggest levers to raise it — presented as a table with recommendations, not a single figure. Fill in your data below.

Tower / Site ROI Model

Build a returns model for a telecom tower/site investment — capex, per-tenant rental, O&M and energy costs, tenancy ramp, and payback and IRR over the horizon — as a multi-year projection to support the decision. Fill in your inputs below.

Network Capex / Opex Plan

Get a capex and opex plan for your network build or expansion — itemised capital investment by phase, recurring operating costs, funding split, and a cash-flow view — so you invest in the right order without running out of cash. Fill in your plan below.

FTTH Unit Economics Model

Model the unit economics of an FTTH area — cost per home passed and per home connected, ARPU, contribution per subscriber, penetration break-even and payback — as a structured analysis to decide whether an area is worth wiring. Fill in your inputs below.

Subscriber Cohort Analysis

Get a subscriber cohort analysis framework and worked read-out — how to build monthly join cohorts, track retention and revenue over time, spot the drop-off points, and estimate lifetime value. Fill in what data you have below.

Plan Pricing & Profitability Analysis

Analyse the profitability of your broadband plans — contribution margin per plan after bandwidth and support cost, the mix effect, and pricing/structure recommendations — so your line-up makes money, not just subscribers. Fill in your plans below.

Expansion Business Case

Build a business case for a telecom expansion or investment — new area, new service, or infrastructure — with market opportunity, investment and returns, risks and a recommendation, ready to present to a lender or partner. Fill in the opportunity below.

HR, Field Ops & Safety

Field Technician SOP

Get a field technician SOP for a broadband/telecom operation — job assignment, pre-visit checks, installation/repair standards, quality and customer sign-off, and reporting — so every visit is professional and first-time-right. Fill in your context below.

Technician Hiring Kit

Get a hiring kit for field technicians — a clear job description, screening questions, a practical skills test, and a probation scorecard — to hire dependable people for installation and repair roles. Fill in your context below.

Work Order & Ticket Workflow

Design a work order and ticketing workflow for field operations — ticket creation and categorisation, assignment and SLA, status flow, escalation, and closure with verification — so nothing falls through the cracks. Fill in your context below.

Field & Electrical Safety Policy

Draft a field and electrical safety policy for broadband/telecom field staff — road and two-wheeler safety, ladder and low-height work, electrical precautions, tool safety, and incident reporting — to protect your team on the ground. Fill in your context below.

Technician Training Programme

Get a structured training programme for field technicians — fibre and networking basics, installation and splicing skills, customer handling, safety, and an assessment — to bring new hires up to speed and upskill the team. Fill in your context below.

Field Operations Plan

Get a field operations plan for your ISP/telecom service area — territory and beat design, technician-to-subscriber ratios, routing and productivity targets, spares and logistics, and daily/weekly rhythm. Fill in your context below.

FTTH Installation SOP

Get a detailed FTTH/broadband installation SOP — site survey and cable routing, ONT/router setup and testing, neat termination and labelling, customer demo and sign-off, and documentation — to deliver clean, reliable installs. Fill in your context below.

Field Staff Incentive Structure

Design an incentive structure for field technicians and installers — rewards for installs, first-time-right and low repeat visits, upsell and customer rating — that motivates the right behaviour without encouraging shortcuts. Fill in your inputs below.

Contracts & Legal

Broadband Subscriber Agreement

Draft a broadband subscriber agreement / terms of service — service and plan, charges and billing, CPE and installation, acceptable use and FUP, suspension, liability and grievance redressal — clear and TRAI-consistent. Fill in the terms below.

Interconnect / Peering Agreement

Draft an interconnect/peering agreement between two networks — points of interconnect, traffic and capacity, settlement or settlement-free basis, technical standards, SLAs and liability. Fill in the deal terms below.

Right of Way / Wayleave Agreement

Draft a Right of Way / wayleave agreement between a landowner (private, RWA or authority) and a telecom operator — access and permitted works, charges and restoration, indemnity, and term — for laying or maintaining fibre/infrastructure. Fill in the terms below.

Equipment Supply Agreement

Draft an equipment supply agreement between a telecom operator and a vendor — scope and specifications, pricing and delivery, warranty and support, acceptance testing, and liability — for OLTs, ONTs, routers or other network gear. Fill in the deal terms below.

Network EPC / Turnkey Contract

Draft an EPC/turnkey contract for a network build (FTTH area, OFC route or tower cluster) — scope and deliverables, milestones and payments, quality and testing, liquidated damages, warranty and handover. Fill in the project terms below.

Bandwidth / IP Transit Agreement

Draft a bandwidth / IP transit lease agreement between an upstream provider and a customer operator — committed capacity and burst, SLA and support, pricing and commitment period, and remedies. Fill in the deal terms below.

Telecom Mutual NDA

Draft a mutual non-disclosure agreement tailored to telecom discussions — network designs, subscriber data, commercials and RFP information — with clear confidentiality, data-protection and return-of-information terms. Fill in the parties below.

Colocation / PoP Hosting Agreement

Draft a colocation/PoP hosting agreement — rack/space and power, cross-connects, access and security, SLA and support, and charges — between a facility provider and an operator hosting network equipment. Fill in the deal terms below.

ISP Franchise / Sub-Operator Agreement

Draft an ISP franchise / sub-operator agreement — territory and brand licence, revenue share and settlement, network and support responsibilities, KYC and compliance, quality standards, and term — to expand your broadband footprint through local partners. Fill in the deal terms below.

Marketing & Growth

ISP Marketing Plan

Get a marketing plan for your ISP/broadband business — positioning, channel mix (field, digital, referral, local partnerships), acquisition offers, a monthly calendar, and budget and KPIs — to grow connections steadily. Fill in your context below.

New Area Launch Campaign

Get a launch campaign to acquire subscribers quickly in a newly-wired area — pre-launch buzz, launch offer, RWA and society tie-ups, feet-on-street plan, and a day-by-day rollout — to convert homes-passed into connections. Fill in your context below.

Referral Program Designer

Design a subscriber referral program for your ISP/broadband business — reward structure for referrer and referee, qualifying rules, promotion, and tracking — that drives low-cost, high-trust acquisition. Fill in your inputs below.

ISP Brand Identity Kit

Get a brand identity kit for your ISP/telecom business — name and tagline options, brand personality, colour and visual direction, messaging pillars, and tone of voice — to look professional and stand out locally. Fill in your context below.

Social Media Content Plan

Get a month of social media content for your ISP/telecom business — post ideas across offers, tips, service updates and testimonials, a posting calendar, and caption examples — to build a local following and trust. Fill in your context below.

ISP Website Content Writer

Get website copy for your ISP/telecom business — home, plans, coverage, about and contact sections — with clear structure, benefit-led messaging, plan tables and calls to action that convert visitors into enquiries. Fill in your context below.

Google Business Profile Optimizer

Get a Google Business Profile optimisation plan for your ISP/telecom or mobile shop — category and services setup, a keyword-rich description, posts and photos strategy, and a review-generation plan — to rank in local search and maps. Fill in your context below.

Subscriber Loyalty Program

Design a loyalty program for your broadband subscribers — tenure rewards, upgrade and referral perks, on-time-payment benefits, and tiers — that increases retention and lifetime value without heavy discounting. Fill in your inputs below.

This is AI-assisted guidance. Verify with a qualified professional before any binding decision. Fees, authorities and processes vary by state and change over time — confirm with your state authority.
